Spring, summer, autumn, winter

1 Watch the video.

2 2.36 Listen and read. Why do some parts of the world have seasons?

You know that the **equator** is an imaginary line that goes around Earth. It divides Earth into two **hemispheres**: the northern and southern hemispheres.

Earth's **axis** is another imaginary line. It passes through the centre of Earth between the North Pole and the South Pole.

You can see in the diagrams that Earth's axis isn't vertical. It **tilts** to one side. Earth travels around the sun in one year (365 days). As it travels, different places on Earth are closer to the sun. This is why there are different seasons.

Look at the picture of Earth in December.

The North Pole **tilts away from** the sun. This means that the northern hemisphere will be **colder** in December. The South Pole **tilts towards** the sun in December, so that's when the southern hemisphere is **warmer**. This is why it's winter in the northern hemisphere when it's summer in the southern hemisphere.

Find the equator in the diagrams. Why don't countries on the equator have the four seasons? They're at the **centre** of Earth, so they have the **same amount** of sunlight all year.

3 2.37 Listen and think. Is it the northern or southern hemisphere?

FINGERPRINTS

What are fingerprints?

Did you know that nobody has the same pattern of lines on their fingers and thumbs? They are already formed by the time we are born and they never change. They leave marks on the things we hold or touch. This happens because our skin produces oil and salt on our fingers. This mixture leaves a print on the things we touch.

How was fingerprinting invented?

In 1892, a police officer in Argentina discovered a fingerprint at a crime scene. It was the first time fingerprints were used to find a criminal. In the same year, a British man called Francis Galton wrote a book that showed all the ways fingerprints can be identified. The way in which detectives identify fingerprints is still used today.

How do the police use fingerprints today?

The method for taking fingerprints has not changed very much either, but today the police can use lasers to help them find hidden fingerprints. Modern technology has also made police work much easier. Nowadays millions of criminal fingerprints are kept on an international electronic system and computer programs can match fingerprints very quickly and accurately.

Personal Data

1 **Look at the pictures.** How do fingerprints help the police solve crimes?

2 3.09 **Listen and read the text.** Check your ideas in Activity 1.

3 **Circle the correct words to complete the sentences.**

1 Our fingerprints **change** / **leave marks** when we touch things.
2 The first criminal was identified from fingerprints in **Britain** / **Argentina**.
3 How the police take fingerprints **is very** / **isn't much** different today.
4 **Computers** / **Lasers** can match fingerprints to their owners very quickly.

4 **Look at these fingerprints. How are they different?** Compare your fingerprints to the ones in the pictures.

您可能关心的问题

Power Up和学校英语课有什么区别?

Power Up以更生动、更系统、更注重实际应用和能力融合的方式,深化和拓展校内学习。它不是简单重复课本内容,而是通过任务式学习和跨学科融合,培养孩子"用英语做事"的能力,目标是"超越课本、面向未来"。

孩子零基础可以学吗?

完全可以!Level 1专为零起点学习者精心设计,通过大量视听材料、歌曲韵律和互动游戏,让孩子在轻松愉快的氛围中自然接触英语、建立语感,完全不用担心跟不上。

如何确保学习效果?

我们通过"课堂互动-单元任务-官方考试"三位一体的闭环体系,多维度保障学习效果。每个环节都有明确的目标,确保孩子的进步扎实可靠、有据可查。

温馨提示: 每个孩子的学习节奏不同，确保孩子从最适合的起点开始学习。
